

## WHAT IS CLAIM

1. (cancelled)

2. (amended) A compound prepared by introducing an element belonging to an alkali metal group or a transition metal group into a vacant lattice point of  $\text{In}_2\text{O}_3$  crystal having  $\text{Sc}_2\text{O}_3$  type translational symmetric crystalline structure.

3. (amended) A compound prepared by introducing H into a vacant point of ZnO having hexagonal wurtzite type crystalline structure.
